

# The Mass Crane & Hoist Companies

“I have worked with Mass Crane

for many years and have come to rely on them from initial design and installation to startup and service.”

–Bradlee Farrin  
Corporate Facilities Manager  
Milton Cat, Londonderry, NH

# SUCCESSFUL CRANE PROJECTS START WITH SINGLE ACCOUNTABILITY

Multiple Custom-Designed  
30' Span Semi-Gantry  
5 Ton Cranes

50 Ton, 40' Span, Totally Freestanding,  
Building-Independent Bridge Crane System  
with (2) 25-Ton Double Girder Cranes

5 Ton Freestanding Bridge Crane System with Top Running Single Girder Crane

Jib Crane Installation, Portsmouth Memorial Bridge, Portsmouth, NH

# FROM THE SIMPLE TO

Multiple Bridge Enclosed Track Freestanding Workstation Crane System with Gorbel G-Force Ergonomic Lifting Hoists

72 Ton, 70' Span Class D  
Double Girder Bridge Crane

“Mass Crane runs  
a class operation.

Their employees are awesome,  
and our crane looks great.”

-Tim Dugan  
Employee Health & Safety Specialist,  
Elbit Systems of America, Merrimack, NH

THE EXTRAORDINARY.

15 Ton, multiple runway patented track bridge  
crane system for the United Airlines Wide Body  
Hangar at Dulles International Airport

# UNIQUE SOLUTIONS THROUGH INNOVATIVE THINKING

Our engineers have great stories to tell. They can tell you about the 200 Ton crane for Westinghouse that they installed from inside the building with very little headroom in a 12-day window during Christmas shutdown; or the twin 15 Ton 105' span full catwalk cranes they built for a major New England service center in under 5 months; or the 20 Ton, 45' span double girder crane installed 300 ft below ground in Providence, RI. MA Crane's engineers have done it all, and they're looking for the next challenge. Whether your application is small or large, simple or beyond belief, the path to success starts with the smartest, most experienced minds in crane design.

Freestanding 15 Ton Bridge Crane System with 30' Span, 15 Ton Double Girder Bridge Crane

"Everything Mass Crane has done for us has been extremely impressive: design, fabrication, installation, and start-up."

## IT'S ALL ABOUT EXECUTION

It starts with a great plan. Then it's all about execution. Great ideas are useless without having experienced, focused people to make them reality. Our team of expert technicians and installers are a cut above

in bringing your crane system to life with smooth, flawless, and problem-free efficiency. We set high standards, and it shows in system reliability and performance.

15 Ton Double Girder Class D Bridge Crane for OTIS Air Force Base, Buzzards Bay, MA

Dual 10 Ton, 75' Span Class "D" Single Girder Class "D" Monobox Bridge Cranes

# MORE TECHNICIANS AND MORE LOCATIONS MEANS LESS DOWNTIME FOR YOUR SYSTEM

Mass Crane and Hoist's service department has three locations and on-call technicians throughout New England. From regular inspections and maintenance to after-hour breakdowns, your crane service is 24/7 and rarely more than an hour away.

- Largest crane service staff in New England
- Licensed technicians and certified welders
- Average experience of service technicians is 15 years each
- 20 fully-equipped service trucks
- Preventive maintenance programs, including automatic notification of your system inspection dates
- Innovative inventory software system ensures that parts are usually stocked on service vehicles (reduces your downtime and cost)

- 24-hour emergency service
- Proprietary TRACKER software ensures that the hoisting equipment in your facility is periodically inspected for OSHA compliance and optimal performance.

On-site inspection using Mass Crane's proprietary Tracker software

"From concept to design, and through to the installation phase, Mass Crane was on time, on budget, and installed exactly what suited our requirements."

Custom-designed fall protection bridge crane system sharing a runway with a Mass Crane and Hoist built 15 Ton Double Girder Bridge Crane

## YOUR PARTNER IN OSHA AND SAFETY COMPLIANCE

Individual and group crane and hoist operational and safety training

When the work of the engineers, fabricators, and installers is complete, the most critical process begins: training your staff on safe crane and hoist operation in compliance with the latest state and federal (OSHA) regulations. With decades of expertise in safety training, as well as a new division specializing in Fall Protection systems, our team will outfit you with the know-how and gear to conform to the ever more stringent OSHA safety requirements.
